COPPERCRAFT

BY **FABRAL** A EURAMAX COMPANY

CopperCraft combines Old World Craftsmanship with modern day technology and equipment to provide high quality yet affordable Architectural Sheet Metal Products.

CopperCraft's Master Craftsmen have over 100 years experience and our training program assures high quality and service 30 years from now. The combination of Auto-Cad and the latest advances in cutting and forming equipment provide high quality at competitive prices.

STRUCTURAL INTEGRITY & AESTHETICS

Understanding that structural integrity and performance are as important as aesthetics, and applying this understanding to the

manufacture of our products is what sets CopperCraft apart from the competition.

Design, engineering, testing and fabrication methods that meet stringent structural and performance standards make the difference. At CopperCraft we don't just cut and solder sheet metal into attractive ornaments, we design and engineer our product line from the inside out.

CUPOLAS

Add elegance and a touch of Old World class to your home or project with cupolas manufactured by CopperCraft.

CopperCraft cupolas are available with windows or louvers to suit your application.

Cupolas add beauty, character and value to any project and are virtually maintenance free.

CopperCraft cupolas are hand crafted units shipped ready to install.

CopperCraft offers a complete line of standard designs or can custom fabricate to your design or project needs.

FINIALS, SPIRES & STEEPLES

A handcrafted finial or spire adds beauty to your project, whether residential or commercial.

All finials and spires come complete with their own mounting brackets custom tailored to your roof application and are available with lightning protection packages as well.

CopperCraft manufactures a complete line of steeples for most applications. Choose from any one of our standard designs or let us custom manufacture to your specifications.

All steeples are prefabricated and shipped fully assembled from our Texas facility.

DORMERS & SKYLIGHTS

CopperCraft decorative dormers are self contained prefabricated units that require no framing and are ready to be set into place.

Units include large factory soldered roof flanges to receive slate, standing seam or shingles.

Choose from a variety of stock designs or let CopperCraft custom design a unit to your specifications.

TESTING & ENGINEERING

- Quality assurance through professional engineering
- Structural analysis and certification
- Air flow and pressure drop analysis
- Ventilation and free area calculation
- Custom design capabilities
- Manufacturer's warranty
- Unsurpassed quality, delivery and customer service
- A nationwide network of representatives

Water penetration test ASTM E-331

Wind load test Chamber ASTM E-330

DETAILS & SPECIFICATIONS

AT YOUR FINGER TIPS.

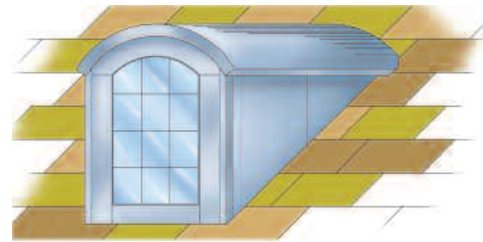

We know your time is valuable and that being able to get complete, up-to-date product information quickly and easily is important to your success. That's why we built CopperCraft.com for you.

Visit CopperCraft.com for:

- Product and service information
- CAD drawings and specifications
- News and current projects
- Locate a Sales Representative in your area
